13:00	Diamond Beach --> Svínafellsjökull Glacier	0:50	55	0:30	DON'T FOLLOW Google Maps. It will say turn right on F road Svínafellsjökull Glacier. Instead, continue West for a short bit and turn right on Sinafellajokusvegur to get to the car park. The more westerly road is in dreadful shape, but brings you to a parking lot near the ice. The more easterly road is in great shape, but leaves you with a 20 minute or so walk to the ice.
14:30	Svínafellsjökull Glacier --> Svartifoss Waterfall	0:15	7	2:00	Drive to Skatafell Visitor Center, then hike. Svartifoss cannot be seen from the road and the hike up to it takes some 90 minutes back and forth (3km RT) with photo stops.
17:00	Svartifoss Waterfall --> Fjaðrárgljúfur Canyon	1:05	80	1:00	Make a right to road 206, before the small village of Kirkjubæjarklaustur. Road 206 is the one that goes to Lakagígar. Once on this road, Fjaðrárgljúfur canyon is around two kilometers away. Shortly after, there is a small intersection that leads to the canyon by turning left and to Lakagígar to the right (road 206 becomes an F-road shortly after – for suitable vehicles only). This final stretch of the road to the canyon is gravel but doable for virtually any type of car, just drive slowly if you're in a smaller one.
